Question 2

Accuracy: 96.5%

Statistics are indicators of change and allow meaningful comparisons to be made. While it may be the issues rather than the statistics that grab people's attention, it should be recognised that it is the statistics that inform the issues. Statistical literacy, then, is the ability to accurately understand, interpret and evaluate the data that inform these issues.

Question 3

Accuracy: 98.1%

The numbers on US student debt, after all, are truly staggering. The average 2015 US university graduate who took out loans to help pay for tuition enters the workforce with \$35,000 in student debt. In the US, total student debt exceeds \$1.15 trillion - dwarfing, for instance, the nation's credit card debt.

Question 1

Correct: 4/4

Most groups of animals have their specialist feeders adapted to a very limited type of food. Among reptiles, perhaps the most extraordinary is an African egg-eating snake. Many snakes eat eggs as part of a varied diet but the egg eater eats exclusively eggs. Small, soft-shelled eggs are easy to eat, as they can be quickly opened by the snake's teeth. Larger, hard-shelled eggs such as those laid by birds need special treatment. However, some types of egg-eating snakes eat only birds' eggs which they swallow whole as they have few teeth. They have tooth-like spines that stick down from the backbone and crack open the egg as it passes down the snake's throat.
