Correct: 4/4

f animals have their specialist feeders adapted to a very limited type of food. Among reptiles , perhaps the most extraordinary is an
ating snake. Many snakes eat eggs as part of a varied diet but the egg eater eats exclusively eggs. Small, soft-shelled eggs are
to eat, as they can be quickly opened by the snake's teeth. Larger, hard-shelled eggs such as those laid by birds need special treatment.
e types of egg-eating snakes eat only birds' eggs which they swallow whole as they have few teeth. They have tooth-like spines that stick
: backbone and crack open the egg as it passes down the snake's throat .

EXPECTED	ANSWER	RESULT
reptiles	reptiles	Correct
diet	diet	Correct
easy	easy	Correct
throat	throat	Correct

Correct: 3/3

ety of courses in various disciplines, Asking The Right Questions helps students bridge the gap between simply memorizing or
ing information, and the greater challenge of critical analysis and synthesis. Specifically, this concise text teaches students to think
by exploring the components of arguments - issues, conclusions, reasons, evidence, assumptions, language - and on how to spot fallacies,
, and obstacles to critical thinking in both written and visual communication. It teaches them to respond to alternative points of view and
d foundation for making personal choices about what to accept and what to reject .

EXPECTED	ANSWER	RESULT
bridge	bridge	Correct
critically	critically	Correct
reject	reject	Correct

Correct: 4/4

y have fine physical defenses such as hard armor or sharp spines. It may have powerful chemical defenses such as an appalling
asting flesh. But none of these defenses is much used in a struggle for survival unless the animal also has the right behavior to go with it.
see a living creature's size, colour, and other features. It also shapes an animal's actions and behavior patterns. The most important

es a living creature's size, colour, and other features. It also shapes an animal's actions and behavior patterns. The most important **instinctive** and inbuilt. In other words, the creature can perform the action without having to learn what to do and how to do it by and error.

EXPECTED	ANSWER	RESULT
physical	physical	Correct
appalling	appalling	Correct
instinctive	instinctive	Correct
trial	trial	Correct

Correct: 4/4

ecule that does two things. First, it acts as the **hereditary** material, which is passed **down** from generation to generation. cts, to a considerable extent, the construction of our bodies, telling our cells what kinds of molecules to make and guiding our development celled zygote to a fully formed adult. These two things are, of course, connected. The DNA sequences that construct the best bodies are get passed down to the next generation because well-constructed bodies are more likely to **survive** and thus to reproduce. This is **theory** of natural selection stated in the language of DNA.

EXPECTED	ANSWER	RESULT
hereditary	hereditary	Correct
down	down	Correct
survive	survive	Correct
theory	theory	Correct

Correct: 5/5

: Children is **designed** to help children become more willing and able to question, reason, construct arguments, and collaborate. based on concepts such as ‘truth’, ‘fairness’, or ‘bullying’. In a typical lesson, pupils and teachers sit together in a circle and the teacher enting a stimulus, **which** could be a video clip, image or newspaper article to provoke pupils’ interest. This is generally followed by nking time before the class splits into groups to think of questions that **interest** them. A certain question with philosophical potential d by the group to stimulate a whole-class discussion. These discussions are supported by activities **to** develop children’s skills reasoning and their understanding of concepts.

EXPECTED	ANSWER	RESULT
designed	designed	Correct
which	which	Correct
interest	interest	Correct
to	to	Correct
in	in	Correct

Correct: 4/4

the analysis of music is a solitary activity, completed by individual theorists, performers, or conductors before their interpretations are through writing, presentation, or performance. A similar model is often used for teaching analysis: students are given the context in which a posed, taught the most appropriate analytical approaches, and then asked to complete their analysis on their own, usually outside of class work assignment. **However**, recent research into cognitive science has found that students learn better in a group than **individually** concept “collective general intelligence” to describe a group’s ability to perform better on complex tasks such as solving puzzles, making its, and brainstorming. In education fields, this concept has been applied to “peer learning” in **which** students learn from other participating in communal activities, discussions, and tasks and this has also been shown to result in more effective learning than the tary method of learning. These more active and collaborative forms of learning are able to better provide conceptual understanding and wledge retention **because** students are placed at the center of their own learning.

EXPECTED	ANSWER	RESULT
However	However	Correct
individually	individually	Correct
which	which	Correct
because	because	Correct

Correct: 2/2

n frogs in the Amazon owe their great diversity to ancestors that leapt into the region from the Andes Mountains several times during the years, a new study from The University of Texas at Austin suggests. This is the first study to show that the Andes **have been** a major rsity for the Amazon basin, one of the largest reservoirs of **biological** diversity on Earth. The finding runs counter thoroughly to the zonian diversity is the result of evolution only within the tropical forest itself.

EXPECTED	ANSWER	RESULT
have been	have been	Correct
biological	biological	Correct

Correct: 4/4

eat listeners. And that may be because man and man's best friend use analogous brain regions to process voices. Researchers collected and samples, including human and canine vocalizations, as well as environmental noises and silence. They **played** these clips to 22 dogs while the subjects' brains **were undergoing** functional MRI scans. Human brains tuned in most to vocal sounds. Dog brains were to environmental noises. **Nevertheless**, they still had a lot in common. A dedicated brain area reacted strongly to the vocalizations of ies. That area also responded to the voices of the other species. Meanwhile, a different brain region noted emotion in a voice, with a strong eery sounds like laughter and a weaker reaction to unhappy noises like canine whining. The study is in the journal Current Biology. It usands of years of domestication **have made** our furry friends sensitive to the same vocal cues we are. You can confide in Fido.

EXPECTED	ANSWER	RESULT
played	played	Correct
were undergoing	were undergoing	Correct
Nevertheless	Nevertheless	Correct
have made	have made	Correct
