

BEL turns passive English study into active, voice-led practice.

A live learner-first platform where students do more than watch and listen. They speak, type, review, and retain language through structured output.

STATUS

Live product

FOCUS

Input to output to retention

WHY ELEVENLABS

Scale voice-led learning content

BEL / Better English Learning

Listening

Speaking

Reading

Writing

Vocabulary + SRS

PROBLEM

Most English learning still leaves learners consuming language instead of producing it.

FOR LEARNERS

- Passive videos and audio are easy to consume but harder to retain.
- Students need more frequent output: speak, type, answer, repeat.

FOR TEACHERS

- High-quality narrated content is expensive to produce repeatedly.
- Manual voice production slows lesson creation and consistency.

FOR THE PRODUCT

- Without a scalable voice layer, listening and reading practice stay narrow.
- Engagement drops when content depth cannot keep pace with learner demand.

BEL THESIS

Every passive learning step should become an active language production step.

BEL closes the loop from input to output to feedback to retention.

CORE PRACTICE

- Type, Speak, Fill, Watch, Notes, Pronounce, Writing Challenge, Survival
- Adaptive difficulty and scoring make each session actionable
- Pronunciation analysis adds high-signal speaking feedback

RETENTION SYSTEM

- Vocabulary Book plus spaced repetition review
- Weak words move into structured review instead of being lost
- Reading Journey extends the voice-led content layer

DASHBOARD

TYPE MODE

PRONUNCIATION FEEDBACK

SRS REVIEW

BEL leads with learners, then expands through tutors and classrooms.

TARGET USER

Output-focused English learners, with current A2 / PTE-first positioning on the live landing flow.

ACQUISITION

Tutor network, student-facing content, and a live product demo that maps directly to real practice tasks.

MONETIZATION DIRECTION

Learner subscriptions and services first, with classroom workflows increasing retention and expansion value.

WHY THIS CAN WIN

- Learner app is the main story, not an admin tool looking for users.
- Educator distribution and classroom operations create a practical second layer.
- BEL can combine practice depth, feedback, and voice content in one loop.

EXPANSION PROOF: CRM / LMS LAYER

PROOF

BEL already looks like a shipped product, not a concept deck.

2026-02-06

TEAM FOOTPRINT

26 tutors

with about 10 people working on the company / project

ElevenLabs is the voice layer that makes BEL's next content step scalable.

ALREADY HAPPENING

- BEL already uses ElevenLabs for student-facing voice content.
- The team has a new podcast-style student channel built with ElevenLabs audio.
- YouTube: youtube.com/@EnglishwithBEL

GRANT UNLOCK

- Narrated lessons and guided listening prompts
- Audiobook-style reading content and read-along practice
- Faster voice production across lessons, stories, and channels

CONTENT PIPELINE

1. LESSON / STORY SOURCE

Teacher-created or AI-assisted content for listening and reading practice.

2. ELEVENLABS VOICE LAYER

Natural narration, character voices, and scalable audio production.

3. BEL PRACTICE LOOP

Students listen, respond, speak, review vocabulary, and repeat inside the product.

BEL is being built by educators with execution proof, not by a generic AI team.

OPERATING FACTS

10

people working on the company / project

26

tutors in the wider teaching operation

1

learner-first product spanning study, feedback, and classroom tools

WHY THIS TEAM MATTERS

- Direct learner and tutor context informs what gets built.
- The team already ships product, operations, and content in parallel.
- That combination is well suited to a voice-first learning product.

REVIEWER TAKEAWAY

BEL understands the teaching problem, the learner problem, and the production problem.

- Not just an AI wrapper
- Not just a tutoring business
- A product plus educator network with a clear voice-content use case

CLOSING

With ElevenLabs, BEL can make active English practice feel more human and more scalable.

TODAY

Live product

Active practice across listening, speaking, reading, writing, vocabulary, and retention loops.

NEXT

Voice-led content

Narrated lessons, audiobook-style reading, richer prompts, and scalable student content.

ASK

Back BEL now

ElevenLabs support would accelerate the product's strongest content and engagement lever.

FINAL MESSAGE

BEL already has the learning loop. ElevenLabs can help it build the voice layer that makes that loop more engaging, more immersive, and easier to scale.
